

# CareWeb

The **fastest way** to  
access your patient's full  
community health record.

CareWeb combines all available data in a patient's electronic medical record and wraps it into one single view. Because CareWeb is powered by the Indiana Health Information Exchange's robust clinical data repository--the largest of its type in the nation--it's the fastest and best way to access patient information. CareWeb allows you to focus your attention on your patient, instead of spending time manually pulling and searching for records.

#### **SINGLE SIGN ON**

Support decision making with a more-complete clinical picture.

#### **SEARCH FUNCTION**

Close the information gaps during patient transitions between care sites.

#### **COORDINATE CARE**

Improve performance of quality measures, outcomes, and metrics.

Indiana Health Information Exchange

The CareWeb application provides access to clinical data fortified by Indiana's hospitals, clinics, organizations, and care providers.

#### Additional Benefits

Easy navigation within the patient's community health record

• Single sign-on capabilities

• HIPAA secure with physician-led governance

• Can support a more complete billing for services

• User access for the full care-team

• Reduce redundancy of testing

Let us know if you're interested in having easy access to the most updated information at your fingertips.
